

Jay C. Conrad Ph.D.

Merck Center for Catalysis, Princeton University, New Jersey USA

Jay Conrad received his B.Sc. degree in chemistry from St. Mary's University in 2001. He carried out doctoral research under the supervision of Professor Deryn Fogg at the University of Ottawa, and obtained his Ph.D. in 2007. His doctoral work included studies on the effect of replacing chloride with pseudohalides within ruthenium metathesis catalysts, identifying oligomer intermediates in ring-closing metathesis reactions and the high-throughput optimization of metathesis reactions. He is currently a postdoctoral fellow in the laboratory of Professor MacMillan directing the Merck Center Catalysis in the Chemistry Department at Princeton University where his research focuses on high-throughput organocatalysis.
